Chapter 02 Accounting Judgements

	Student:
1.	Recognition requires the measurement of an item for inclusion in the financial statements.
	True False
2.	The use of historical cost, rather than liquidation value, is supported by the continuity assumption.
	True False
3.	The use of fair value rather than historical cost increases both the relevance and verifiability of the financial statements.
	True False
4.	The separate entity assumption has more validity for a larger corporation than it would for a sole proprietorship.
	True False
5.	The unit of measure assumption holds that all aspects of a company's business operations can be readily quantified.
	True False

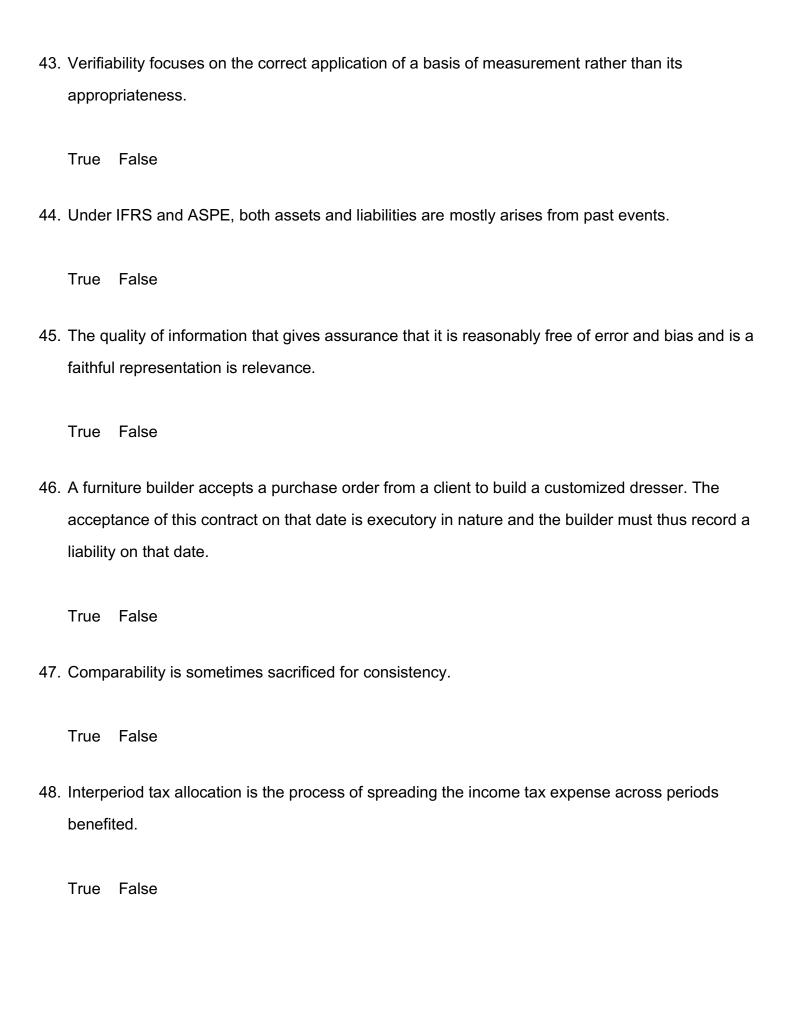

36.	The fu	Il disclosure principle asserts that the financial reports of a business enterprise should
	disclos	se all reliable information relating to its economic affairs.
	True	False
37.	Releva	ance and representation faithfulness are the fundamental qualities under IFRS.
	True	False
38.	The se	eparate entity assumption applies only to legally separate entities such as corporations; it
	does r	not apply to proprietorships or other unincorporated businesses.
	True	False
39.	Under	IFRS 13, a publicly quoted share price would be an example of a Level 1 Input.
	True	False
40.	Comp	arability is an enhancing quality under IFRS and ASPE.
	True	False
41.	The co	ost-benefit trade-off is a persuasive constraint under both IFRS and ASPE.
	True	False
42.	Materi	ality is a component of representational faithfulness under IFRS.
	True	False

49.	In classifying the elements of financial statements	, the primary	distinction	between	revenues	and
	gains is the materiality of the amounts involved.					

True False

- 50. The going concern or continuity assumption is critical to financial accounting. The assumption
 - A. Is always maintained for all firms for all years.
 - B. Supports the use of historical cost valuation for assets rather than market values.
 - C. Means that a corporation has a definite ending date.
 - D. Requires that we immediately expense prepaid accounts because they do not represent a future cash inflow.
- 51. The objective of financial reporting is:
 - A. To provide the market value of a firm at a point in time.
 - B. To provide the total market value of its common stock.
 - C. To provide information useful for decision making by investors and creditors.
 - D. To require all companies to comply with GAAP.

52. A firm's accounting policy is to immediately expense the cost of metal wastebaskets it purchases for use by its employees at their desks. The total cost of wastebaskets in any year is \$1,000 and the firm has \$6 billion in total assets. The firm expects the wastebaskets to last indefinitely. The firm

A. Is violating GAAP

B. Is invoking the materiality constraint

C. Is invoking the conservatism constraint

D. Is violating the relevance principle

E. None of these answers are correct.

53. The sales manager of a firm has the use of a blue company-owned automobile to use to visit potential customers. The sales manager also owns her own identical car except that it is red. The manager paid for the red car with funds earned from her employment as sales manager. The firm will report the cost of the blue auto in its balance sheet, but not the red auto. This is an example of:

A. Reliability

B. Matching

C. Separate entity

D. Going concern

E. None of these answers are correct.

	A. separate entity assumption.
	B. full-disclosure principle.
	C. cost principle.
	D. cost/benefit constraint.
	E. reliability quality.
55.	Which of the following accounting concepts best justifies the use of accruals and deferrals?
	A. Cost/benefit constraint
	B. Unit-of-measure assumption
	C. Continuity assumption
	D. Materiality constraint
56.	Accounting traditionally has been influenced by conservatism because of the:
	A. probability of undetected errors in the financial statements.
	B. difficulty in measuring net income on the accrual basis.
	C. inherent uncertainties of many accounting measurements.
	D. difficulty in making certain calculations.
	E. large number of transactions recorded in any one period.

54. Preparation of financial statements with adequate notes is primarily based on the:

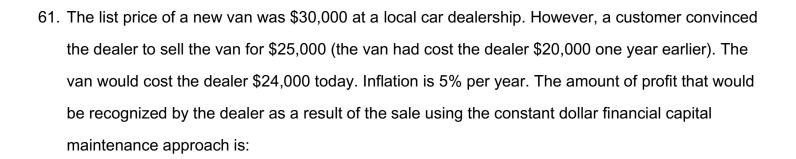

- 57. The continuity assumption is the basis for the rule that:
 - A. the income statement should not include material gains and losses that are both unusual and infrequent.
 - B. treasury stock should not be reported in the balance sheet as an asset.
 - C. the cost of installing a machine should not be included in the recorded cost of the machine, but rather expensed immediately.
 - D. the cost of operational assets should be allocated to expense systematically and rationally over their useful lives.
- 58. S Corporation offered to issue 5,000 shares of its no par value common shares to another company in exchange for a building at a time when there were 1,000,000 shares already outstanding and were selling for \$4.00 per share at the time. The owner of the building had the opportunity to sell it to a competing buyer for \$26,000. However, because the seller wanted the S Corporation shares, S's offer was accepted. At what amount should the building be reported in S's financial statements?
 - A. \$26,000
 - B. \$10,000
 - C. \$20,000
 - D. \$16,000

59. C Corporation exchanged 20,000 shares of its nonconvertible preferred shares for land owned by B Corporation. A competing buyer previously had offered \$150,000 cash for the land. Because of tax consequences, the cash offer was not accepted and the lot was exchanged for the shares. C Corporation previously had sold only 100 shares of its preferred shares at \$9 per share several months ago. Based on the cost principle, at what amount should the land be reported on C's financial statements?

- A. \$180,000
- B. \$165,000
- C. \$150,000
- D. \$160,000

60. The list price of a new van was \$30,000 at a local car dealership. However, a customer convinced the dealer to sell the van for \$25,000 (the van had cost the dealer \$20,000 one year earlier). The van would cost the dealer \$24,000 today. Inflation is 5% per year. The amount of profit that would be recognized by the dealer as a result of the sale using the nominal dollar approach is:

- A. \$10,000
- B. \$2,500
- C. \$5,000
- D. \$6,000

- A. \$10,000
- B. \$4,000
- C. \$5,000
- D. \$9,000
- 62. The list price of a new van was \$30,000 at a local car dealership. However, a customer convinced the dealer to sell the van for \$25,000 (the van had cost the dealer \$20,000 one year earlier). The van would cost the dealer \$24,000 today. Inflation is 5% per year. The amount of profit that would be recognized by the dealer as a result of the sale using the physical capital maintenance approach is:
 - A. \$1,000
 - B. \$2,500
 - C. \$5,000
 - D. \$6,000

63.	Acc	counting informa	ation is considered to be relevant when it
		can be depende represent.	d on to represent the economic conditions and events that it is intended to
	B. i	s capable of ma	king a difference to a decision-maker.
	C. i	s understandab	le by reasonably informed users of accounting information.
	D. i	s verifiable and	neutral.
64.		e quality of inform	mation that gives assurance that it is reasonably free of error and bias and is a
	A. r	elevance.	
	B. r	eliability.	
	C. v	verifiability.	
	D. r	neutrality.	
	E. 1	None of these a	nswers are correct.
65.	Tim	neliness is an inç	gredient of the qualitative criteria of
	1 2 3 4	Relevance Yes No Yes No	Reliability Yes Yes No No
	Α. (Choice 1	

B. Choice 2

C. Choice 3

D. Choice 4

66. Verifiability is an ingredient of the qualitative criteria of

	Relevance	Reliability
1	Yes	No
2	Yes	Yes
3	No	No
4	No	Yes

- A. Choice 1
- B. Choice 2
- C. Choice 3
- D. Choice 4

67. Neutrality is an ingredient of the qualitative criteria of

	Relevance	Reliability
ı	Yes	Yes
2	No	Yes
3	Yes	No
4	No	No

- A. Choice 1
- B. Choice 2
- C. Choice 3
- D. Choice 4

68. Predictive value is an ingredient of the qualitative criteria of

	Relevance	Reliability
1	Yes	No
2	Yes	Yes
3	No	No
4	No	Yes

- A. Choice 1
- B. Choice 2
- C. Choice 3
- D. Choice 4

69. Representational faithfulness is an ingredient of the qualitative criteria of

	Reliability	Relevance
1	Y'es	Yes
2	No	Yes
3	Yes	No
4	No	No

- A. Choice 1
- B. Choice 2
- C. Choice 3
- D. Choice 4

	A. assist investors in predicting prospective cash flows.
	B. assist investors in analyzing the economy.
	C. assist suppliers in determining an appropriate discount to offer a particular company.
	D. enable banks to determine an appropriate interest rate for their commercial loans.
71.	If, in year 1, a company used LIFO; year 2, FIFO; and in year 3, moving average cost for
	inventory valuation, which of the following assumptions, constraints, or principles would be
	violated:
	A. cost.
	B. time period.
	C. matching.
	D. consistency.
	E. materiality.
72.	Which of the following qualities does the cost principle primarily support?
	A. Predictive value
	B. Conservatism
	C. Verifiability
	D. Timeliness

70. A primary objective of financial reporting is to:

	the:
	A. time period assumption.
	B. industry peculiarities constraint.
	C. relevance quality.
	D. full-disclosure principle.
	E. comparability characteristic.
7.4	
/4.	Certain costs of doing business are capitalized when incurred and then amortized over
	subsequent accounting periods to:
	A. aid management in decision-making.
	B. match the costs incurred with revenues earned.
	C. conform to the conservatism constraint.
	D. conform to the comparability characteristic.
	E. reduce the income tax.
75.	Adjusting entries are needed because an entity:
	A. has earned revenue during the period by selling products from its central operations.
	B. has expenses.
	C. uses the accrual basis of accounting.
	D. uses the cash basis of accounting rather than the accrual basis.

73. The inclusion of notes and supporting schedules in the financial statements reflect application of

76.	A large international corporation immediately expenses the \$50 cost of a small item of office
	equipment. This is an example of:
	A. reliability.
	B. conservatism.
	C. materiality.
	D. an accounting error.
	E. None of these answers are correct.
77.	When an \$30 asset with a six-year estimated useful life is recorded as an expense at the date of
	purchase, this is an application of the:
	A. matching principle.
	B. cost principle.
	C. unit-of-measure assumption.
	D. materiality constraint.
	E. None of these answers are correct.
78.	Which of the following distinguishes the personal transactions of business owners from business
	transactions?
	A. Unit-of-measure assumption
	B. Full-disclosure principle
	C. Materiality constraint
	D. Separate entity assumption

82.	A corporation reports the sale of some of its shares to a shareholder in its financial statements,
	and the shareholder reports the same transaction as an investment. Therefore,
	A. the revenue recognition principle has been violated.
	B. the separate entity assumption has been violated.
	C. the double entry accounting concept has been violated.
	D. no accounting concept has been violated.
83.	The separate entity assumption:
	A. requires periodic income measurement.
	B. is applicable to both incorporated and unincorporated businesses.
	C. is not applicable to an unincorporated business.
	D. recognizes the legal nature of a business organization.
0.4	An accounting arror pacy he all of the following except:
04.	An accounting error may be all of the following except:
	A. A mistake.
	B. An inaccurate estimate made in good faith.
	C. intentional.
	D. unintentional.

85.	Under which of the following will revenues and expenses most likely be reported in the period
	they are earned or incurred?
	A. Cash basis accounting
	B. A combination of accrual and cash basis accounting
	C. Single entry accounting
	D. Accrual basis accounting
86.	Estimating bad debt expense for the period is based primarily on the:
	A. cost principle.
	B. conservatism constraint.
	C. full-disclosure principle.
	D. revenue recognition principle.
	E. matching principle.

A	Prepaid insurance	900	000
В	Cash Depreciation expense	10,000	900
c	Accumulated depreciation. Wages payable.	1 3,000	000,01
	Cash		3,000
D	Inventory of Merchandise	4,000	4,000
Wh	ich entry must have been made as	a direct	result of the matching principle?
A. <i>A</i>	4		
В. Е	3		
C. (C		
D. [D .		
8. The	e assumption that dollars will buy th	ne same (quantity of goods and services today as they would
hav	re five years ago is the:		
A. r	evenue recognition principle.		
	revenue recognition principle.		
B. t			
B. t	ime period assumption.		

89.	Revenues and expenses often are recognized in income statement accounts even though no
	cash has been received or paid. This is primarily a result of applying the:
	A. full-disclosure principle.
	B. continuity assumption.
	C. revenue recognition principle.
	D. accrual basis of accounting.
90.	The underlying assumptions of accounting include all of the following except:
	A. unit-of-measure.
	B. separate entity.
	C. time period.
	D. continuity.
	E. conservatism.
91.	The measurement conventions of accounting include all of the following except:
	A. continuity.
	B. full-disclosure.
	C. historical cost.
	D. matching.
	E. revenue recognition.

92.	The implementation constraints include all of the following except:	
	A. materiality.	
	B. conservatism.	
	C. cost/benefit.	
	D. separate entity.	
93.	The underlying concept that the value of accounting information must exceed the expenditures	
	incurred to provide it is called the:	
	A. substance over form.	
	B. cost/benefit implementation constraint.	
	C. conservatism.	
	D. full-disclosure principle.	
94.	The materiality constraint:	
	A. is only relevant when preparing annual financial statements as opposed to quarterly	
	statements.	
	B. is applicable only for low-cost items that cost less than, say, \$500.	
	C. is the only defence for gross negligence by an independent accountant.	
	D. does not necessarily imply that an immaterial amount can be ignored for accounting purposes.	

	B. time period assumption.
	C. cost/benefit constraint.
	D. separate entity assumption.
96.	An item is not material if:
	A. The accounting equation (A = L + OE) does not include the item.
	B. It decreases the qualitative usefulness of the financial statements, but not the quantitative usefulness.
	C. Its cost is less than \$25.
	D. Its omission will not influence the judgement of a reasonable person.
97.	Financial information exhibits the characteristic of consistency when
	A. Expenses are reported as charges against revenue in the period in which they are paid.
	B. Accounting entities give "accountable" events the same accounting treatment from period to period.
	C. Unusual or infrequent gains and losses are not included on the income statement.
	D. accounting procedures are adopted which give a consistent rate of net income.

95. The use of deferrals and accruals is a direct result of the:

A. unit-of-measure assumption.

98.	Valuing assets at their liquidation values rather than their cost is inconsistent with the
	A. time period assumption.
	B. matching principle.
	C. materiality constraint.
	D. historical cost principle.
99.	Which of the following is NOT a time when revenue may be recognized?
	A. At time of sale of goods.
	B. At receipt of cash from sale of goods.
	C. During production of goods.
	D. Sale of Property of a manufacturing company.
100	O.Application of the full disclosure principle
	A. is theoretically desirable but not practical because the costs of complete disclosure exceed the benefits.
	B. is violated when important financial information is buried in the notes to the financial statements.
	C. is demonstrated by the use of supplementary information presenting the effects of changing prices.
	D. requires that the financial statements be consistent and comparable.

101	.Which of the following relates to both relevance and reliability?	
	A. Cost-benefit constraint.	
	B. Predictive value.	
	C. Verifiability.	
	D. Representational faithfulness.	
	E. None of these answers are correct.	
102. Charging off the cost of a calculator with an estimated useful life of 10 years as an expense		
	the period when purchased is an example of the application of the	
	A. consistency characteristic.	
	B. matching principle.	
	C. materiality constraint.	
	D. historical cost principle.	
103	.Which of the following accounting concepts states that before a transaction is recorded, sufficient	
	evidence must exist to allow two or more knowledgeable individuals to reach essentially the	
	same conclusion about the transaction?	
	A. Continuity assumption	
	B. Separate entity assumption	
	C. Cost principle	
	D. Reliability quality	
	E. Materiality constraint	

104.The recognition of periodic amortization expense on company-owned automol	oiles requires
estimating both salvage or residual value, and the useful life of the vehicles. T	he use of estimates
in this case is an example of:	
A. Conservatism	
B. Maintaining consistency	
C. Invoking the materiality constraint rather than the cost benefit constraint	
D. Providing relevant data at the expense of reliability	
E. None of these answers are correct.	
105.A firm does not know exactly how long its equipment will last. The firm decides	s to use shorter
rather than longer useful lives for amortizing the equipment. This is an example	e of:
A. Reliability	
B. Materiality	
C. Conservatism	
D. Unit of measure	
E. None of these answers are correct.	
106.Revenue is recognized when	
A. It is collected in cash	
B. Service is rendered	
C. Service is rendered and collection is probable	
D. The contract is signed	
E. When the customer places the order	
10.1 11.0 10.0 10.0 1.0 0.0 0.0 0.0 0.0	

107. The matching concept

- A. Requires that a debit is matched or posted for every credit
- B. Treats all costs as being directly related to revenue generation
- C. Treats all costs as expenses
- D. Is the name applied to the process of associating expenses with revenues
- 108.A firm signs a major contract in December to construct custom machinery for a client. No work is begun the current year, yet the notes to the firm's financial statements discuss the nature and dollar amount of the contract. This is an example of
 - A. Reliability
 - B. Full disclosure
 - C. Historical cost
 - D. Conservatism
 - E. None of these answers are correct.
- 109.A firm purchased \$40,000 of supplies in its first year of operations but used up only \$30,000 of the supplies during the year. Therefore:
 - A. Under the relevance characteristic, the firm should expense \$40,000
 - B. Because the firm is a going concern, the firm should record \$40,000 of supplies in the balance sheet at the end of the year
 - C. Under the materiality constraint, it makes no difference what the firm does with respect to accounting for supplies
 - D. Under the matching concept, the firm should report \$30,000 of expense

110.J. Green is the sole owner and manager of the ABC Lawn and Grass Service. Green purchased			
a new station wagon only for personal use. Green uses a dump truck in the business. Which of			
the following assumptions, principles, or constraints would be violated if Green recorded the cost			
of the station wagon as an asset of the business?			
A NA-tovi-lite and topical			
A. Materiality constraint			
B. Conservatism constraint			
C. Continuity assumption			
D. Full-disclosure principle			
E. Separate entity assumption			

111.Recording periodic depreciation on assets such as buildings or machinery is an application of

the:

A. cost principle.

B. materiality constraint.

D. matching principle.

E. conservatism constraint.

C. unit-of-measure assumption.

F. None of these answers are correct.

112.Wh	nen assets are a	cquired, they should be recorded in the accounts in conformity with the:
A.	cost principle.	
B.	full-disclosure pr	inciple.
C.	materiality const	raint.
D.	separate entity a	assumption.
E.	matching princip	le.
113.Un	ider ASPE (Priva	te Entity GAAP), which of the following is an ingredient of reliability?
A.	Predictive value	
В.	Materiality	
C.	Understandabilit	у
D.	Verifiability	
114.Un	nder ASPE, feedl	pack value is an ingredient of:
1 2 3 4	Relevance Yes Yes No No	Reliability Yes No No Yes
A.	Choice 1	
B.	Choice 2	
C.	Choice 3	
D.	Choice 4	

115. The information provided by financial reporting pertains to: A. individual business enterprises and the economy as a whole, rather than to industries or to members of society as consumers. B. individual business enterprises, industries and the economy as a whole, rather than to members of society as consumers. C. individual business enterprises, rather than to industries of the economy as a whole or to members of society as consumers. D. individual business enterprises and industries rather than to the economy as a whole or to members of society as consumers. 116.Relevance is sometimes sacrificed for: A. Reliability. B. Comparability C. Objectivity. D. Conservatism. 117. If accounting information is timely and has predictive and feedback value, then it can be characterized as: A. Verifiable. B. Qualitative. C. Reliable. D. Relevant.

	A. Comparability (including consistency).
	B. Understandability.
	C. Relevance.
	D. Materiality.
119	Relevance is not a function of:
	A. feedback value.
	B. verifiability.
	C. timeliness.
	D. predictive value.
120	Accrual accounting is essentially an application of:
	A. the conservatism principle.
	B. the historical cost principle.
	C. the materiality constraint.
	D. the matching principle.

118. The primary qualitative criteria of accounting information include which of the following:

121.Increases in equity (net assets) from peripheral or incidental transactions of an entity are called	:k
A. revenues.	
B. gains.	
C. net income.	
D. economic benefits.	
122.At the date of purchase of a service which is not immediately used up, the cost of such unused service is a(n):	I
A. revenue.	
B. liability.	
C. asset.	
D. expense.	

applicable in the following cases.
All significant post-balance sheet events are reported.
2. Personal transactions of the proprietor are distinguished from business transactions.
3. Goodwill is capitalised and amortised over the periods benefited.
4. Assuming that dollars today will buy as much as 10 years ago.
5. Rent paid in advance is recorded as prepaid rent.
6. Financial statements are prepared each year.
7. All payments less than \$25 are expensed as incurred. (Do not use conservatism.)
8. The company employs the same inventory valuation method from period to period.

123. State the accounting assumption, principle, information characteristic, or constraint that is most

24.State the accounting assumption, principle, information characteristic or constraint that is mos
applicable:
1. An officer of Nanuck Inc. purchased a new home computer for personal use with company
money, charging miscellaneous expense.
2. A machine, which cost \$60,000, is reported at its current market value of \$90,000.
3. Nanuck Inc. decides to establish a large loss and related liability this year because of the
possibility that it may lose a pending patent infringement lawsuit. The possibility of loss is
considered remote by its lawyers.
4. Because the company's income is low this year, a switch from accelerated depreciation to
straight-line depreciation is made this year.
5. The president of Nanuck Inc. believes it is foolish to report financial information on a yearly
basis. Instead, the president believes that financial information should be disclosed only when
significant new information is available related to the company's operations.

1. Recognition of revenue at the end of production is an allowable exception to the ____principle. 2. Parenthetical balance sheet disclosure of the inventory method utilised by a particular company is an application of the _____ principle. 3. Corporations must prepare accounting reports at least yearly due to the assumption. 4. Some costs, which give rise to future benefits cannot be directly associated with the revenues they generate. Such costs are allocated in a _____ and ____ and ____ manner to the periods expected to benefit from the cost. 5. _____ would allow the expensing of all repair tools when purchased, even though they have an estimated life of 3 years. 6. The _____ characteristic requires that the same accounting method be used from one accounting period to the next, unless it becomes evident that an alternative method will bring about a better description of a firm's financial situation. 7. _____ and ____ are the two primary qualities that make accounting information useful for decision making. 8. Information which helps users confirm or correct prior expectations has 9. _____ enables users to identify the real similarities and differences in economic phenomena because the information has been measured and reported in a similar manner for different enterprises

125. Fill in the blanks below with the accounting principle, assumption, or related item that BEST

completes each sentence.

126.Explain how the continuity assumption and the historical cost principle are related.
127.Stratford decided in October of the current fiscal year to start a massive advertising campaign to
enhance the marketability of its product. In November, the company paid \$750,000 for
advertising time on a major radio chain to advertise its product during the next 12 months. The
chief accountant expensed the \$750,000 in the current fiscal year on the basis that "once the
money was spent, it could never be recovered from the radio chain".
State whether or not you agree with the accounting treatment given to this disbursement and
support your opinion with principles discussed in the chapter on the Criteria for Accounting
Choices.

128.ABC Inc. is being sued by a client for an alleged breach of contract. The company's lawyers are uncertain as to what the outcome of the case will be. The client is suing ABC for \$500,000 plus arrearages. Should ABC record a liability on its books due to the impending litigation? Why or why not?
129.Explain how revenues and gains are similar and how they differ.

130.A mining company with global operations sets up a mining operation in Northern Quebec. Five years later, the mine is completely depleted and the area abandoned. The company has an excellent track record, both with respect to its corporate citizenship and environmental responsibility, having always restored all mining sites to their original state, regardless of any contractual obligations.

However, the company did not restore the land on its Northern Quebec mining site, citing recent cash flow issues and the absence of any written agreement to do so with the Quebec government.

The Quebec government then decides to sue the company, for damages to its land.

Do you think the Quebec government has a strong case here? Why or why not?

124.	State the accounting assumption, principle, information characteristic or constraint that is most applicable:			
	1. An officer of Nanuck Inc. purchased a new home computer for personal use with company money, charging miscellaneous expense.			
	2. A machine, which cost \$60,000, is reported at its current market value of \$90,000.			
	3. Nanuck Inc. decides to establish a large loss and related liability this year because of the possibility that it may lose a pending patent infringement lawsuit. The possibility of loss is considered remote by its lawyers.			
	4. Because the company's income is low this year, a switch from accelerated depreciation to straight-line depreciation is made this year. 5. The president of Nanuck Inc. believes it is foolish to report financial information on a yearly basis. Instead, the president believes that financial information should be disclosed only when significant new information is available related to the company's operations.			
	 Separate entity. Historical cost Matching (also, conservatism) Consistency. Time period 			

125.	Fill in the blanks below with the accounting principle, assumption, or related item that BEST
	completes each sentence.
	1. Recognition of revenue at the end of production is an allowable exception to the
	principle.
	2. Parenthetical balance sheet disclosure of the inventory method utilised by a particular
	company is an application of the principle.
	3. Corporations must prepare accounting reports at least yearly due to the
	assumption.
	4. Some costs, which give rise to future benefits cannot be directly associated with the
	revenues they generate. Such costs are allocated in a and
	manner to the periods expected to benefit from the cost.
	5 would allow the expensing of all repair tools when purchased,
	even though they have an estimated life of 3 years.
	6. The characteristic requires that the same accounting method be
	used from one accounting period to the next, unless it becomes evident that an alternative
	method will bring about a better description of a firm's financial situation.
	7 and are the two primary qualities
	that make accounting information useful for decision making.
	8. Information which helps users confirm or correct prior expectations has
	9 enables users to identify the real similarities and differences
	in economic phenomena because the information has been measured and reported in a
	similar manner for different enterprises
	1. revenue realisation
	2. full disclosure
	3. time period

- 8. feedback value
- 9. comparability

Beechy - Chapter 02 #125

Blooms: Knowledge

Difficulty: Medium

Learning Objective: 02-03 Apply the universal and entity specific assumptions underlying the foundation of GAAP.

Expenses, a component of earnings, are measured in terms of the historical cost of resources (assets) consumed or used in producing revenue because, under the continuity assumption, there is no assumption that the assets used in operations will be sold. Using historical cost allows an evaluation of how management created value with the assets entrusted to them, measured at the actual cost of those resources. Thus, income reflects the excess of revenues over the historical cost, rather than market value, of the resources used.

An alternative approach to earnings measurement, not supported by the continuity assumption, would employ market values of revenues and costs (expenses) to determine an "opportunity" cost measure of earnings.

The continuity assumption also supports the inclusion of certain costs in assets used in operations, as opposed to immediate expensing of those costs, even though there is no expectation that such costs will be recouped on sale of the asset. The value of such operational assets is derived through use, rather than from sale, under the continuity assumption. Specific examples include installation costs of equipment, and many prepaid assets such as prepaid rent. In the latter example, if the firm were not a going concern, prepaid rent would not represent an asset beyond the liquidation date.

Beechy - Chapter 02 #126

Blooms: Knowledge

Difficulty: Medium

Learning Objective: 02-03 Apply the universal and entity specific assumptions underlying the foundation of GAAP.

127. Stratford decided in October of the current fiscal year to start a massive advertising campaign

to enhance the marketability of its product. In November, the company paid \$750,000 for

advertising time on a major radio chain to advertise its product during the next 12 months. The

chief accountant expensed the \$750,000 in the current fiscal year on the basis that "once the

money was spent, it could never be recovered from the radio chain".

State whether or not you agree with the accounting treatment given to this disbursement and

support your opinion with principles discussed in the chapter on the Criteria for Accounting

Choices.

This treatment violates the matching principle because the revenues to be gained for the

advertising campaign will only be experienced in the accounting period in which the

advertising will be aired. The \$750,000 disbursement should be set up as a prepaid expense

to be expensed in the proportion of the advertising incurred to the total advertising contract

cost.

Learning Objective: 02-03 Apply the universal and entity specific assumptions underlying the foundation of GAAP.

128. ABC Inc. is being sued by a client for an alleged breach of contract. The company's lawyers

are uncertain as to what the outcome of the case will be. The client is suing ABC for \$500,000

plus arrearages. Should ABC record a liability on its books due to the impending litigation?

Why or why not?

No. Although some might argue that not recording a liability in this case would be a violation of

the conservatism principle, no liability should be recorded, as the outcome of the litigation is

uncertain. Kindly recall that to qualify as liabilities obligations must require a future transfer of

assets, be an unavoidable current obligation and result from a past transaction. Although the

lawsuit arose as a result of ABC's actions in a prior period, there is no transfer of assets or

unavoidable current obligation, since the outcome of the litigation has not yet been

determined.

Beechy - Chapter 02 #128

Blooms: Knowledge

Difficulty: Medium

Learning Objective: 02-06 Discuss the criteria for recognizing business events and transactions in the financial records.

129. Explain how revenues and gains are similar and how they differ.

Both revenues and gains increase net income and net assets. However, revenues arise more

from a company's day-to-day operations and routine transactions (usually from the company's

line of business) while gains arise from non day-to-day non routine transactions such as the

sale of assets. In the latter case, a gain would arise if the company sold an asset for an

amount greater than the book value of that asset.

Beechy - Chapter 02 #129

130. A mining company with global operations sets up a mining operation in Northern Quebec. Five years later, the mine is completely depleted and the area abandoned. The company has an excellent track record, both with respect to its corporate citizenship and environmental responsibility, having always restored all mining sites to their original state, regardless of any contractual obligations.

However, the company did not restore the land on its Northern Quebec mining site, citing recent cash flow issues and the absence of any written agreement to do so with the Quebec government.

The Quebec government then decides to sue the company, for damages to its land.

Do you think the Quebec government has a strong case here? Why or why not?

While there is no legal obligation for the company to restore the land, there may well be a morale (constructive) obligation to do so. For obvious reasons, the ethical thing for the company to do would be to restore the land. The Quebec government may argue that they granted the company mining rights because they had a reasonable expectation that the company would restore the land since it had always done so in the past. Indeed, the Quebec government may have a strong case here. The company should restore the land, and should accrue a liability for its best estimate of the cost of doing so. Failure to do so would compromise the representational faithfulness of the company's statements by understating its liabilities. Even if the company refused to voluntarily restore the land, a judge would likely side with the Quebec government here.

Note that IFRS requires the recognition of constructive obligations such as these when they are likely and measurable, in addition to recognizing legal obligations. ASPE is less specific, recognition of legal obligations only.

Learning Objective: 02-07 Describe the measurement methods used in the accounting standards for private enterprises.
