Ch 02 Financial Statements, Cash Flow, and Taxes

6. The income statement shows the difference between a firm's income and its costs— i.e., its profits— during a specified period of time. However, not all reported income comes in the form of cash, and reported costs likewise may not correctly reflect cash outlays. Therefore, there may be a substantial difference between a firm's reported profits and its actual cash flow for the same period.

Ch 02 Financial Statements, Cash Flow, and Taxes

26. Below are the year-end balance sheets for Wolken Enterprises:

<u>Assets:</u>	<u>2015</u>	<u>2014</u>
Cash	\$ 200,000	\$ 170,000
Accounts receivable	864,000	700,000
Inventories	<u>2,000,000</u>	<u>1,400,000</u>
Total current assets	\$3,064,000	\$2,270,000
Net fixed assets	<u>6,000,000</u>	<u>5,600,000</u>
Total assets	<u>\$9,064,000</u>	<u>\$7,870,000</u>
 <u>Liabilities and equity:</u>		
Accounts payable	\$1,400,000	\$1,090,000
Notes payable	<u>1,600,000</u>	<u>1,800,000</u>
Total current liabilities	<u>\$3,000,000</u>	<u>\$2,890,000</u>
Long-term debt	2,400,000	2,400,000
Common stock	3,000,000	2,000,000
Retained earnings	<u>664,000</u>	<u>580,000</u>
Total common equity	<u>\$3,664,000</u>	<u>\$2,580,000</u>
Total liabilities and equity	<u>\$9,064,000</u>	<u>\$7,870,000</u>

Wolken has never paid a dividend on its common stock, and it issued \$2,400,000 of 10-year non-callable, long-term debt in 2014. As of the end of 2015, none of the principal on this debt had been repaid. Assume that the company's sales in 2014 and 2015 were the same. Which of the following statements must be CORRECT?

- Wolken increased its short-term bank debt in 2015.
- Wolken issued long-term debt in 2015.
- Wolken issued new common stock in 2015.
- Wolken repurchased some common stock in 2015.
- Wolken had negative net income in 2015.

Ch 02 Financial Statements, Cash Flow, and Taxes

33. Companies generate income from their "regular" operations and from other sources like interest earned on the securities they hold, which is called non-operating income. Lindley Textiles recently reported \$12,500 of sales, \$7,250 of operating costs other than depreciation, and \$1,000 of depreciation. The company had no amortization charges and no non-operating income. It had \$8,000 of bonds outstanding that carry a 7.5% interest rate, and its federal-plus-state income tax rate was 40%. How much was Lindley's operating income, or EBIT?

- a. \$3,462
- b. \$3,644
- c. \$3,836
- d. \$4,038
- e. \$4,250

ANSWER: e

RATIONALE:	Sales	\$12,500
	Operating costs excluding depr'n	\$7,250
	Depreciation	\$1,000
	Operating income (EBIT)	\$4,250

POINTS: 1

Ch 02 Financial Statements, Cash Flow, and Taxes

34. Frederickson Office Supplies recently reported \$12,500 of sales, \$7,250 of operating costs other than depreciation, and \$1,250 of depreciation. The company had no amortization charges and no non-operating income. It had \$8,000 of bonds outstanding that carry a 7.5% interest rate, and its federal-plus-state income tax rate was 40%. How much was the firm's taxable income, or earnings before taxes (EBT)?

- a. \$3,230.00
- b. \$3,400.00
- c. \$3,570.00
- d. \$3,748.50
- e. \$3,935.93

ANSWER: b

RATIONALE:	Bonds	\$8,000.00
	Interest rate	7.50%
	Sales	\$12,500.00
	Operating costs excluding depr'n	\$7,250.00
	Depreciation	\$1,250.00
	Operating income (EBIT)	\$4,000.00
	Interest charges	-\$600.00
	Taxable income	\$3,400.00

Ch 02 Financial Statements, Cash Flow, and Taxes

35. Meric Mining Inc. recently reported \$15,000 of sales, \$7,500 of operating costs other than depreciation, and \$1,200 of depreciation. The company had no amortization charges, it had outstanding \$6,500 of bonds that carry a 6.25% interest rate, and its federal-plus-state income tax rate was 35%. How much was the firm's net income after taxes? Meric uses the same depreciation expense for tax and stockholder reporting purposes.

- a. \$3,284.55
- b. \$3,457.42
- c. \$3,639.39
- d. \$3,830.94
- e. \$4,022.48

ANSWER: d

RATIONALE:	Bonds	\$6,500
	Interest rate	6.25%
	Tax rate	35%
	Sales	\$ 15,000
	Operating costs excluding depr'n	\$ 7,500
	Depreciation	<u>\$ 1,200</u>
	Operating income (EBIT)	\$6,300.00
	Interest charges	<u>-\$ 406.25</u>
	Taxable income	\$5,893.75
	Taxes	<u>-\$2,062.81</u>
	Net income	\$3,830.94

QUESTION ID: JFND-GO4G-EO5U-EPBT

:

Ch 02 Financial Statements, Cash Flow, and Taxes

36. Last year Tiemann Technologies reported \$10,500 of sales, \$6,250 of operating costs other than depreciation, and \$1,300 of depreciation. The company had no amortization charges, it had \$5,000 of bonds that carry a 6.5% interest rate, and its federal-plus-state income tax rate was 35%. This year's data are expected to remain unchanged except for one item, depreciation, which is expected to increase by \$750. By how much will net after-tax income change as a result of the change in depreciation? The company uses the same depreciation calculations for tax and stockholder reporting purposes.

- a. -463.13
- b. -487.50
- c. -511.88
- d. -537.47
- e. -564.34

ANSWER: b

RATIONALE: This problem can be worked very easily— just multiply the increase in depreciation by $(1 - T)$ to get the decrease in net income:

Change in depreciation	\$750
Tax rate	35%
Reduction in net income	-\$487.50

We can also get the answer a longer way, which explains things more clearly:

Item	<u>Old</u>	<u>New</u>	<u>Change</u>
Bonds	\$ 5,000.00	\$ 5,000.00	\$ 0.00
Interest rate	6.5%	6.5%	0.0%
Tax rate	35%	35%	0%
Sales	\$10,500.00	\$10,500.00	\$ 0.00
Operating costs excluding depr'n	\$ 6,250.00	\$ 6,250.00	\$ 0.00
Depreciation	<u>\$ 1,300.00</u>	<u>\$ 2,050.00</u>	<u>\$750.00</u>
Operating income (EBIT)	\$ 2,950.00	\$ 2,200.00	-\$750.00
Interest charges	<u>\$ 325.00</u>	<u>\$ 325.00</u>	<u>\$0.00</u>
Taxable income	\$ 2,625.00	\$ 1,875.00	-\$750.00
Taxes	<u>\$ 918.75</u>	<u>\$ 656.25</u>	<u>-\$262.50</u>
Net income	<u>\$ 1,706.25</u>	<u>\$ 1,218.75</u>	<u>-\$487.50</u>

Ch 02 Financial Statements, Cash Flow, and Taxes

37. For managerial purposes, i.e., making decisions regarding the firm's operations, the standard financial statements as prepared by accountants under Generally Accepted Accounting Principles (GAAP) are often modified and used to create alternative data and metrics that provide a somewhat different picture of a firm's operations. Related to these modifications, which of the following statements is CORRECT?

a The standard statements make adjustments to reflect the effects of inflation on asset values, and these adjustments are normally carried into any adjustment that managers make to the standard statements.

b The standard statements focus on accounting income for the entire corporation, not cash flows, and the two can be quite different during any given accounting period. However, for valuation purposes we need to discount cash flows, not accounting income. Moreover, since many firms have a number of separate divisions, and since division managers should be compensated on their divisions' performance, not that of the entire firm, information that focuses on the divisions is needed. These factors have led to the development of information that is focused on cash flows and the operations of individual units.

c The standard statements provide useful information on the firm's individual operating units, but management needs more information on the firm's overall operations than the standard statements provide.

d The standard statements focus on cash flows, but managers are less concerned with cash flows than with accounting income as defined by GAAP.

e The best feature of standard statements is that, if they are prepared under GAAP, the data are always consistent from firm to firm. Thus, under GAAP, there is no room for accountants to "adjust" the results to make earnings look better.

38. Which of the following statements is CORRECT?

- a. Net cash flow (NCF) is defined as follows:
$$\text{NCF} = \text{Net income} - \text{Depreciation and Amortization.}$$
- b. Changes in working capital have no effect on free cash flow.
- c. Free cash flow (FCF) is defined as follows:
$$\begin{aligned} \text{FCF} &= \text{EBIT}(1 - T) \\ &+ \text{Depreciation and Amortization} \\ &- \text{Capital expenditures required to sustain operations} \\ &- \text{Required changes in net operating working capital.} \end{aligned}$$
- d. Free cash flow (FCF) is defined as follows:
$$\text{FCF} = \text{EBIT}(1 - T) + \text{Depreciation and Amortization} + \text{Capital expenditures.}$$
- e. Net cash flow is the same as free cash flow (FCF).

Ch 02 Financial Statements, Cash Flow, and Taxes

39. Danielle's Sushi Shop last year had (1) a negative net cash flow from operations, (2) a negative free cash flow, and (3) an increase in cash as reported on its balance sheet. Which of the following factors could explain this situation?

- The company had a sharp increase in its depreciation and amortization expenses.
- The company had a sharp increase in its inventories.
- The company had a sharp increase in its accrued liabilities.
- The company sold a new issue of common stock.
- The company made a large capital investment early in the year.

Ch 02 Financial Statements, Cash Flow, and Taxes

40. Swinnerton Clothing Company's balance sheet showed total current assets of \$2,250, all of which were required in operations. Its current liabilities consisted of \$575 of accounts payable, \$300 of 6% short-term notes payable to the bank, and \$145 of accrued wages and taxes. What was its net operating working capital that was financed by investors?

- a. \$1,454
- b. \$1,530
- c. \$1,607
- d. \$1,687
- e. \$1,771

ANSWER: b

RATIONALE:	Current assets	\$2,250
	Accounts payable	\$575
	Accrued wages and taxes	\$145
	Net operating working capital	\$1,530

Note that NOWC represents the current assets required in operations that are financed by investors, given that payables and accruals are generated spontaneously by operations and are thus "free."

Ch 02 Financial Statements, Cash Flow, and Taxes

41. NNR Inc.'s balance sheet showed total current assets of \$1,875,000 plus \$4,225,000 of net fixed assets. All of these assets were required in operations. The firm's current liabilities consisted of \$475,000 of accounts payable, \$375,000 of 6% short-term notes payable to the bank, and \$150,000 of accrued wages and taxes. Its remaining capital consisted of long-term debt and common equity. What was NNR's total investor-provided operating capital?

- a. \$4,694,128
- b. \$4,941,188
- c. \$5,201,250
- d. \$5,475,000
- e. \$5,748,750

ANSWER: d

<i>RATIONAL</i> Current assets		\$1,875,000
<i>E:</i> Net fixed assets		\$4,225,000
Total assets (all are operating assets)		\$6,100,000
Spontaneous "free" capital:	Acc'ts payable	\$475,000
	Accruals	\$150,000
Total investor-provided operating capital		\$5,475,000

Note that the total operating capital is the amount of the capital, or assets, that are required in operations and that must be financed by investors, given that payables and accruals are generated spontaneously by operations and do not have to be financed by investors.

42. TSW Inc. had the following data for last year: Net income = \$800; Net operating profit after taxes (NOPAT) = \$700; Total assets = \$3,000; and Total operating capital = \$2,000. Information for the just-completed year is as follows: Net income = \$1,000; Net operating profit after taxes (NOPAT) = \$925; Total assets = \$2,600; and Total operating capital = \$2,500. How much free cash flow did the firm generate during the just-completed year?

- a. \$383
- b. \$425
- c. \$468
- d. \$514
- e. \$566

ANSWER: b

RATIONALE:

	<u>Prior Year</u>	<u>Current Year</u>
NOPAT = EBIT(1 – T)	\$700	\$925
Total operating capital	\$2,000	\$2,500
FCF this year = NOPAT – Net investment in new operating capital		
FCF this year = \$425

Ch 02 Financial Statements, Cash Flow, and Taxes

44. Bae Inc. has the following income statement. How much net operating profit after taxes (NOPAT) does the firm have?

Sales	\$2,000.00
Costs	1,200.00
Depreciation	<u>100.00</u>
EBIT	\$ 700.00
Interest expense	<u>200.00</u>
EBT	\$ 500.00
Taxes (35%)	<u>175.00</u>
Net income	<u>\$ 325.00</u>

- a. \$370.60
- b. \$390.11
- c. \$410.64
- d. \$432.25
- e. \$455.00

ANSWER: e

RATIONALE: EBIT \$700.00
Tax rate 35%
NOPAT = **\$455.00**

POINTS: 1

Ch 02 Financial Statements, Cash Flow, and Taxes

45. EP Enterprises has the following income statement. How much net operating profit after taxes (NOPAT) does the firm have?

Sales	\$1,800.00
Costs	1,400.00
Depreciation	<u>250.00</u>
EBIT	\$ 150.00
Interest expense	<u>70.00</u>
EBT	\$ 80.00
Taxes (40%)	<u>32.00</u>
Net income	<u>\$ 48.00</u>

- a. \$81.23
- b. \$85.50
- c. \$90.00
- d. \$94.50
- e. \$99.23

ANSWER:

c

RATIONALE:

EBIT	\$150.00
Tax rate	40%
NOPAT =	\$90.00

POINTS:

1

Ch 02 Financial Statements, Cash Flow, and Taxes

46. Tibbs Inc. had the following data for the year ending 12/31/2015: Net income = \$300; Net operating profit after taxes (NOPAT) = \$400; Total assets = \$2,500; Short-term investments = \$200; Stockholders' equity = \$1,800; Total debt = \$700; and Total operating capital = \$2,300. What was its return on invested capital (ROIC)?

- a. 14.91%
- b. 15.70%
- c. 16.52%
- d. 17.39%
- e. 18.26%

ANSWER: d

RATIONALE:

NOPAT	\$400
Total operating capital	\$2,300

ROIC = NOPAT/Total operating capital ROIC = \$400/\$2,300 ROIC = **17.39%**

Ch 02 Financial Statements, Cash Flow, and Taxes

47. Zumbahlen Inc. has the following balance sheet. How much total operating capital does the firm have?

Cash	\$ 20.00	Accounts payable	\$ 30.00
Short-term investments	50.00	Accruals	50.00
Accounts receivable	20.00	Notes payable	<u>30.00</u>
Inventory	<u>60.00</u>	Current liabilities	\$110.00
Current assets	\$150.00	Long-term debt	70.00
Gross fixed assets	\$140.00	Common stock	30.00
Accumulated deprec.	<u>40.00</u>	Retained earnings	<u>40.00</u>
Net fixed assets	<u>\$100.00</u>	Total common equity	<u>\$ 70.00</u>
Total assets	<u>\$250.00</u>	Total liab. & equity	<u>\$250.00</u>

- a. \$114.00
- b. \$120.00
- c. \$126.00
- d. \$132.30
- e. \$138.92

ANSWER: b

RATIONALE: Total op. capital = Operating current assets – Operating current liabilities + Net fixed assets
 Total operating capital = \$100.00 – \$80.00 + \$100.00 Total operating capital = **\$120.00**

Ch 02 Financial Statements, Cash Flow, and Taxes

48. Wells Water Systems recently reported \$8,250 of sales, \$4,500 of operating costs other than depreciation, and \$950 of depreciation. The company had no amortization charges, it had \$3,250 of outstanding bonds that carry a 6.75% interest rate, and its federal-plus-state income tax rate was 35%. In order to sustain its operations and thus generate sales and cash flows in the future, the firm was required to spend \$750 to buy new fixed assets and to invest \$250 in net operating working capital. How much free cash flow did Wells generate?

- a. \$1,770.00
- b. \$1,858.50
- c. \$1,951.43
- d. \$2,049.00
- e. \$2,151.45

ANSWER:

a

RATIONALE:

Bonds	\$3,250.00
Interest rate	6.75%
Tax rate	35%
Required addition to net operating working capital	\$250.00
Required capital expenditures (fixed assets)	\$750.00
Sales	\$8,250.00
Operating costs excluding depr'n	\$4,500.00
Depreciation	\$950.00
Operating income (EBIT)	\$2,800.00
FCF = EBIT(1 - T) + Depr'n - Cap Ex - ΔNet Op WC	FCF = \$1,820 + \$950 - \$750 - \$250
FCF =	\$1,770.00

Ch 02 Financial Statements, Cash Flow, and Taxes

49. Last year, Michelson Manufacturing reported \$10,250 of sales, \$3,500 of operating costs other than depreciation, and \$1,250 of depreciation. The company had no amortization charges, it had \$3,500 of bonds outstanding that carry a 6.5% interest rate, and its federal-plus-state income tax rate was 35%. This year's data are expected to remain unchanged except for one item, depreciation, which is expected to increase by \$725. By how much will the depreciation change cause the firm's net after-tax income and its net cash flow to change? Note that the company uses the same depreciation calculations for tax and stockholder reporting purposes.

- a. -\$383.84; \$206.68
- b. -\$404.04; \$217.56
- c. -\$425.30; \$229.01
- d. -\$447.69; \$241.06
- e. -\$471.25; \$253.75

ANSWER: e

RATIONALE This problem can be worked very easily— just multiply the increase in depreciation by $(1 - T)$ to get the decrease in net income, and then add to the change in income the change in depreciation to get the change in net cash flow:

Change in depreciation	\$725
Tax rate	35.00%
Reduction in net income = Change in Depr'n $(1 - \text{Tax rate})$	-\$471.25
Increase in net cash flow = Change in Depr'n – reduction in NI	\$253.75

We can also get the answer the long way, which explains things in more detail:

	<u>Old</u>	<u>New</u>	<u>Change</u>
Bonds	\$3,500	\$3,500	\$0.00
Interest rate	6.50%	6.50%	\$0.00
Tax rate	35%	35%	\$0.00
Sales	\$10,250	\$10,250	\$0.00
Operating costs excluding depr'n	\$3,500	\$3,500	\$0.00
Depreciation	\$1,250	\$1,975	\$725.00
Operating income (EBIT)	\$5,500	\$4,775	-\$725.00
Interest charges	\$228	\$228	\$0.00
Taxable income	\$5,273	\$4,548	-\$725.00
Taxes	\$1,845	\$1,592	-\$253.75
Net income after taxes	\$3,427	\$2,956	-\$471.25
Net cash flow	\$4,677	\$4,931	\$253.75
Check on NCF: $\Delta\text{NCF} = \text{change in depreciation} \times \text{tax rate}$			\$253.75

We like this problem because it illustrates that an increase in depreciation will decrease the firm's net income yet increase its net cash flow, and cash is king.

Ch 02 Financial Statements, Cash Flow, and Taxes

50. Bartling Energy Systems recently reported \$9,250 of sales, \$5,750 of operating costs other than depreciation, and \$700 of depreciation. The company had no amortization charges, it had \$3,200 of outstanding bonds that carry a 5% interest rate, and its federal-plus-state income tax rate was 35%. In order to sustain its operations and thus generate sales and cash flows in the future, the firm was required to make \$1,250 of capital expenditures on new fixed assets and to invest \$300 in net operating working capital. By how much did the firm's net income exceed its free cash flow?

- a. \$673.27
- b. \$708.70
- c. \$746.00
- d. \$783.30
- e. \$822.47

ANSWER:

c

RATIONALE:

Bonds	\$3,200.00
Interest rate	5.00%
Tax rate	35.00%
Required capital expenditures (fixed assets)	\$1,250.00
Required addition to net operating working capital	\$300.00
Sales	\$9,250.00
Operating costs excluding depr'n	\$5,750.00
Depreciation	\$700.00
Operating income (EBIT)	\$2,800.00
Interest charges	\$160.00
Taxable income (EBT)	\$2,640.00
Taxes	\$924.00
Net income after taxes	\$1,716.00

FCF = BIT(1 - T) + Depr'n - Cap Ex - ΔNet Op WC

FCF = \$1,820 + \$700 - \$1,250 - \$300

FCF = **\$970.00**

Difference between net income and FCF = **\$746.00**

Ch 02 Financial Statements, Cash Flow, and Taxes

51. Which of the following statements is CORRECT?

aThe maximum federal tax rate on personal income in 2014 was 50%.

.

bSince companies can deduct dividends paid but not interest paid, our tax system favors the use of equity financing over debt financing, and this causes companies' debt ratios to be lower than they would be if interest and dividends were both deductible.

cInterest paid to an individual is counted as income for tax purposes and taxed at the individual's regular tax rate, which in 2014 could go up to 35%, but dividends received were taxed at a maximum rate of 15%.

dThe maximum federal tax rate on corporate income in 2014 was 50%.

.

eCorporations obtain capital for use in their operations by borrowing and by raising equity capital, either by selling new common stock or by retaining earnings. The cost of debt capital is the interest paid on the debt, and the cost of the equity is the dividends paid on the stock. Both of these costs are deductible from income when calculating income for tax purposes.

Ch 02 Financial Statements, Cash Flow, and Taxes

52. Which of the following statements is CORRECT?

aAll corporations other than non-profit corporations are subject to corporate income taxes, which are 15% for the lowest amounts of income and 35% for the highest amounts of income.

bThe income of certain small corporations that qualify under the Tax Code is completely exempt from corporate income taxes. Thus, the federal government receives no tax revenue from these businesses.

cAll businesses, regardless of their legal form of organization, are taxed under the Business Tax Provisions of the Internal Revenue Code.

dSmall businesses that qualify under the Tax Code can elect not to pay corporate taxes, but then their owners must report their pro rata shares of the firm's income as personal income and pay taxes on that income.

eCongress recently changed the tax laws to make dividend income received by individuals exempt from income taxes. Prior to the enactment of that law, corporate income was subject to double taxation, where the firm was first taxed on the income and stockholders were taxed again on the income when it was paid to them as dividends.

53. Assume that Congress recently passed a provision that will enable Barton's Rare Books (BRB) to double its depreciation expense for the upcoming year but will have no effect on its sales revenue or tax rate. Prior to the new provision, BRB's net income after taxes was forecasted to be \$4 million. Which of the following best describes the impact of the new provision on BRB's financial statements versus the statements without the provision? Assume that the company uses the same depreciation method for tax and stockholder reporting purposes.

- Net fixed assets on the balance sheet will decrease.
- The provision will reduce the company's net cash flow.
- The provision will increase the company's tax payments.
- Net fixed assets on the balance sheet will increase.
- The provision will increase the company's net income.

Ch 02 Financial Statements, Cash Flow, and Taxes

56. Olivia Hardison, CFO of Impact United Athletic Designs, plans to have the company issue \$500 million of new common stock and use the proceeds to pay off some of its outstanding bonds. Assume that the company, which does not pay any dividends, takes this action, and that total assets, operating income (EBIT), and its tax rate all remain constant. Which of the following would occur?

- The company would have to pay less taxes.
- The company's taxable income would fall.
- The company's interest expense would remain constant.
- The company would have less common equity than before.
- The company's net income would increase.

ANSWER: e

Ch 02 Financial Statements, Cash Flow, and Taxes

57. On 12/31/2015, Heaton Industries Inc. reported retained earnings of \$675,000 on its balance sheet, and it reported that it had \$172,500 of net income during the year. On its previous balance sheet, at 12/31/2014, the company had reported \$555,000 of retained earnings. No shares were repurchased during 2015. How much in dividends did Heaton pay during 2015?

- a. \$47,381
- b. \$49,875
- c. \$52,500
- d. \$55,125
- e. \$57,881

ANSWER: c

RATIONALE:	12/31/2015 RE	\$675,000
	12/31/2014 RE	\$555,000
	Change in RE	\$120,000
	Net income for 2015	\$172,500
	Dividends = net income – change	\$52,500

Ch 02 Financial Statements, Cash Flow, and Taxes

58. Ullrich Printing Inc. paid out \$21,750 of common dividends during the year. It ended the year with \$187,500 of retained earnings versus the prior year's retained earnings of \$132,250. How much net income did the firm earn during the year?

- a. \$77,000
- b. \$80,850
- c. \$84,893
- d. \$89,137
- e. \$93,594

ANSWER: a

RATIONALE: Net income = The change in retained earnings plus the dividends paid:

Current RE	\$187,500
Previous RE = Current RE – increment	\$132,250
Change in RE	\$55,250
Plus dividends paid	\$21,750
= Net income	\$77,000

Ch 02 Financial Statements, Cash Flow, and Taxes

59. Which of the following statements is CORRECT?

- a. Depreciation and amortization are not cash charges, so neither of them has an effect on a firm's reported profits.
- b. The more depreciation a firm reports, the higher its tax bill, other things held constant.
- c. People sometimes talk about the firm's net cash flow, which is shown as the lowest entry on the income statement, hence it is often called "the bottom line."
- d. Depreciation reduces a firm's cash balance, so an increase in depreciation would normally lead to a reduction in the firm's net cash flow.
- e. Net cash flow (NCF) is often defined as follows:
Net Cash Flow = Net Income + Depreciation and Amortization Charges.

Ch 02 Financial Statements, Cash Flow, and Taxes

60. Which of the following would be most likely to occur in the year after Congress, in an effort to increase tax revenue, passed legislation that forced companies to depreciate equipment over longer lives? Assume that sales, other operating costs, and tax rates are not affected, and assume that the same depreciation method is used for tax and stockholder reporting purposes.

- Companies' reported net incomes would decline.
- Companies' net operating profits after taxes (NOPAT) would decline.
- Companies' physical stocks of fixed assets would increase.
- Companies' net cash flows would increase.
- Companies' cash positions would decline.

Ch 02 Financial Statements, Cash Flow, and Taxes

65. A security analyst obtained the following information from Prestopino Products' financial statements:

- Retained earnings at the end of 2014 were \$700,000, but retained earnings at the end of 2015 had declined to \$320,000.
- The company does not pay dividends.
- The company's depreciation expense is its only non-cash expense; it has no amortization charges.
- The company has no non-cash revenues.
- The company's net cash flow (NCF) for 2015 was \$150,000.

On the basis of this information, which of the following statements is CORRECT?

- Prestopino had negative net income in 2015.
- Prestopino's depreciation expense in 2015 was less than \$150,000.
- Prestopino had positive net income in 2015, but its income was less than its 2014 income.
- Prestopino's NCF in 2015 must be higher than its NCF in 2014.
- Prestopino's cash on the balance sheet at the end of 2015 must be lower than the cash it had on the balance sheet at the end of 2014.

Ch 02 Financial Statements, Cash Flow, and Taxes

69. Lucy's Music Emporium opened its doors on January 1, 2015, and it was granted permission to use the same depreciation calculations for shareholder reporting and income tax purposes. The company planned to depreciate its fixed assets over 20 years, but in December 2015 management realized that the assets would last for only 15 years. The firm's accountants plan to report the 2015 financial statements based on this new information. How would the new depreciation assumption affect the company's financial statements?

- The firm's net liabilities would increase.
- The firm's reported net fixed assets would increase.
- The firm's EBIT would increase.
- The firm's reported 2015 earnings per share would increase.
- The firm's cash position in 2015 and 2016 would increase.

Ch 02 Financial Statements, Cash Flow, and Taxes

70. Which of the following statements is CORRECT?

- a If a company pays more in dividends than it generates in net income, its retained earnings as reported on the balance sheet will decline from the previous year's balance.
- b Dividends paid reduce the net income that is reported on a company's income statement.
- c If a company uses some of its bank deposits to buy short-term, highly liquid marketable securities, this will cause a decline in its current assets as shown on the balance sheet.
- d If a company issues new long-term bonds during the current year, this will increase its reported current liabilities at the end of the year.
- e Accounts receivable are reported as a current liability on the balance sheet.

ANSWER: a

Ch 02 Financial Statements, Cash Flow, and Taxes

71. Which of the following statements is CORRECT?

- a. If a firm reports a loss on its income statement, then the retained earnings account as shown on the balance sheet will be negative.
- b. Since depreciation is a source of funds, the more depreciation a company has, the larger its retained earnings will be, other things held constant.
- c. A firm can show a large amount of retained earnings on its balance sheet yet need to borrow cash to make required payments.
- d. Common equity includes common stock and retained earnings, less accumulated depreciation.
- e. The retained earnings account as shown on the balance sheet shows the amount of cash that is available for paying dividends.

Ch 02 Financial Statements, Cash Flow, and Taxes

72. Jessie's Bobcat Rentals' operations provided a negative net cash flow last year, yet the cash shown on its balance sheet increased. Which of the following statements could explain the increase in cash, assuming the company's financial statements were prepared under generally accepted accounting principles?

- a. The company had high depreciation expenses.
- b. The company repurchased some of its common stock.
- c. The company dramatically increased its capital expenditures.
- d. The company retired a large amount of its long-term debt.
- e. The company sold some of its fixed assets.

Ch 02 Financial Statements, Cash Flow, and Taxes

73. Which of the following statements is CORRECT?

aThe primary difference between EVA and accounting net income is that when net income is calculated, a deduction is made to account for the cost of common equity, whereas EVA represents net income before deducting the cost of the equity capital the firm uses.

bMVA gives us an idea about how much value a firm's management has added during the last year.

cMVA stands for market value added, and it is defined as follows:

. $MVA = (\text{Shares outstanding})(\text{Stock price}) + \text{Book value of common equity}$.

dEVA stands for economic value added, and it is defined as follows:

. $EVA = EBIT(1 - T) - (\text{Investor-supplied op. capital}) \times (A - T \text{ cost of capital})$.

eEVA gives us an idea about how much value a firm's management has added over the firm's life.

74. Which of the following statements is CORRECT?

- One way to increase EVA is to achieve the same level of operating income but with more investor-supplied capital.
- If a firm reports positive net income, its EVA must also be positive.
- One drawback of EVA as a performance measure is that it mistakenly assumes that equity capital is free.
- One way to increase EVA is to generate the same level of operating income but with less investor-supplied capital.
- Actions that increase reported net income will always increase net cash flow.

Ch 02 Financial Statements, Cash Flow, and Taxes

75. Over the years, Janjigian Corporation's stockholders have provided \$15,250 of capital, part when they purchased new issues of stock and part when they allowed management to retain some of the firm's earnings. The firm now has 1,000 shares of common stock outstanding, and it sells at a price of \$42.00 per share. How much value has Janjigian's management added to stockholder wealth over the years, i.e., what is Janjigian's MVA?

- a. \$21,788
- b. \$22,935
- c. \$24,142
- d. \$25,413
- e. \$26,750

ANSWER: e

RATIONALE:	Total book value of equity	\$15,250
	Stock price per share	\$42.00
	Shares outstanding	1,000
	Market value of equity	42,000
	MVA =	26,750

Ch 02 Financial Statements, Cash Flow, and Taxes

77. HHH Inc. reported \$12,500 of sales and \$7,025 of operating costs (including depreciation). The company had \$18,750 of investor-supplied operating assets (or capital), the weighted average cost of that capital (the WACC) was 9.5%, and the federal-plus-state income tax rate was 40%. What was HHH's Economic Value Added (EVA), i.e., how much value did management add to stockholders' wealth during the year?

- a. \$1,357.13
- b. \$1,428.56
- c. \$1,503.75
- d. \$1,578.94
- e. \$1,657.88

ANSWER: c

RATIONALE:

Sales	\$12,500
Operating costs	\$7,025
Operating income (EBIT)	\$5,475
WACC	9.5%
Tax rate	40%
Investor-supplied capital	\$18,750

EVA = EBIT(1 - T) - Investor Capital × WACC
EVA = \$3,285.00 - \$1,781.25
EVA = **\$1,503.75**
